We think you're gonna like it here.

We've suggested some tasks here in your organization's overview to help you get started.

Invite your people

Invite your first member

Find people by their GitHub username or email address.

Customize members' permissions

Set everyone's base permissions for your code.

Collaborative coding

Create a pull request

Propose and collaborate on changes to a repository.

Create a branch protection rule

Enforce certain workflows for one or more branches.

[See more about collaborative coding →](#)

View as: [Public](#) ▾

You are viewing the README and pinned repositories as a public user.

You can [create a README file](#) or [pin repositories](#) visible to anyone.

You can [hide the tasks we've suggested](#) on this page and bring them back later.

Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere?

[Import a repository](#)

Required fields are marked with an asterisk (*).

Owner *

GranTiete2025

Repository name *

GalloFlix

GalloFlix is available.

Great repository names are short and memorable. Need inspiration? How about [shiny-system](#) ?

Description (optional)

Projeto de desenvolvimento Web com HTML/CSS/JAVASCRIPT para consumo de API

Public

Anyone on the internet can see this repository. You choose who can commit.

Private

You choose who can see and commit to this repository.

Initialize this repository with:

Add a README file

This is where you can write a long description for your project. [Learn more about READMEs](#).

Add .gitignore

.gitignore template: **None** ▾

Choose which files not to track from a list of templates. [Learn more about ignoring files](#).

Choose a license

License: **None** ▾

A license tells others what they can and can't do with your code. [Learn more about licenses](#).

This will set **main** as the default branch. Change the default name in GranTiete2025's [settings](#).

You are creating a public repository in the GranTiete2025 organization.

main.js U X

```
js > js main.js > ...
1 // Exibir loading
2 function toggleLoading() {
3     let loader = document.querySelector(".loader");
4     loader.style.display = loader.style.display == "none" ? "block" : "none";
5 }
6
7 // Page Scroll
8 window.addEventListener("scroll", function () {
9     const navbar = document.querySelector(".navbar");
10
11     if (window.scrollY > 50) {
12         navbar.classList.add("scrolled");
13     } else {
14         navbar.classList.remove("scrolled");
15     }
16 });
17
```

A função `toggleLoading()` faz com que o elemento que possui a classe `.loader`, mude seu `display`, para ser exibido ou escondido.

A função de evento `scroll`, faz com que o fundo da navbar mude de cor ao “rolar” a página, será usada nas outras páginas

Temos um resultado, não está bem estilizado, mas é um resultado

Moana 2

Depois de receber um chamado inesperado de seus ancestrais navegadores, Moana vai viajar para mares distantes do Oceania, em águas perdidas em uma aventura perigosa.

```
1 #carousel-home {  
2     height: 100vh;  
3 }  
4  
5 #carousel-home .carousel-item img {  
6     height: 100vh;  
7     object-fit: cover;  
8 }  
9  
10 .carousel-inner .carousel-caption {  
11     background: rgba(0, 0, 0, 0.5);  
12     backdrop-filter: blur(5px);  
13     width: 100%;  
14     left: 0;  
15     padding-left: 100px;  
16     padding-right: 100px;  
17 }  
18  
19 #carousel-home .carousel-caption h3 {  
20     color: #E50914;  
21     font-weight: bolder;  
22     font-size: 32px;  
23 }  
24  
25 @media only screen and (max-width: 500px) {  
26     #carousel-home .carousel-caption h3 {  
27         font-size: 26px;  
28     }  
29 }
```

Entre Montanhas

Dois agentes altamente treinados se aproximam à distância após serem enviados para proteger lados opostos de um desfiladeiro misterioso. Quando um mal emerge, eles precisam trabalhar juntos para sobreviver ao que está lá dentro.

The screenshot shows the Visual Studio Code interface with the following details:

- Explorer View:** Shows the project structure under "GALLOFLIX".
 - css:** index.css, login.css, main.css
 - img:**
 - js:** index.js, login.js, main.js, index.html, login.html, README.mdA red arrow points to the "index.js" file in the "js" folder.
- Code Editor:** The "index.js" file is open, displaying the following code:

```
// Ao carregar a página executa as funções de buscar os dados
document.addEventListener("DOMContentLoaded", async () => {
    setTimeout(() => {
        toggleLoading();
    }, 2000);

    let trendingContainer = document.querySelector("#trendingMovies");
    trendingContainer.innerHTML = "";
    for (let i = 1; i <= 20; i++) {
        trendingContainer.innerHTML += `<a href='detalhes.html?id=${i}'>
            
        </a>`;
    }
});
```
- Status Bar:** Shows the file name "main*", line "Ln 15, Col 1", spaces "Spaces: 4", encoding "UTF-8", and language "JavaScript". It also indicates "Port : 5500" and "Prettier" is active.

Text Content:

Agora no login, após 2 segundos a função `toggleLoading()`, faz com que ele seja encerrado.

E o código a partir da linha 7, pesquisa na página index o elemento de id “trendingMovies”, e através de uma laço de repetição adicionar 20 imagens ao elemento.
